REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 14. THE REDCLIFF REVIEW, THURSDAY, JAN. 7, 1926. Number 1.

ALBERTA PROVINCIAL LIBRARY JAN 9 1969 EDMONTON

Novel Scheme For Adjusting Rural Ridings

WOULD BUNCH URBAN CENTRES TOGETHER AND SEPARATE THEM FROM RURAL DISTRICTS—WOULD WORK TO RURAL ADVANTAGE.

According to news reports from different parts of the province, there is a movement on foot in U. F. A. circles, providing for a re-adjustment of constituencies which appear to be in accordance with plans frequently outlined by Mr. Wood, president of the organization. It has been suggested that this proposed new plan will be up for discussion at the coming session of the legislature when the much talked of redistribution bill is before the house.

The new plan provides that the system of dividing the cities remain the same as far as the cities are concerned, although all rural sections of city ridings will be eliminated, and formed into a strictly rural constituency.

Practically the same will apply to towns and villages. These will not be associated in any way with the surrounding rural section of present constituencies, but instead will be grouped into urban constituencies made up of many towns and villages in certain prescribed sections.

For instance, we take it this plan means that, say, Medicine Hat, Redcliff, Bowell, Suffield, Alderson and possibly Brooks, would be combined into one urban constituency, and the country surrounding these centres divided into two rural districts. The idea would appear to be to have two rural members for one urban member.

It is further proposed to have proportional representation applied to all urban seats, but not in strictly rural constituencies.

The idea certainly is a novel one to say the least, and if adopted would have the effect of giving a tremendous advantage to the rural districts.

At this time, when the whole country realizes there is so much need for that spirit of "come let us reason together," it is rather surprising that any party or organization should be planning changes which would surely have a tendency to drive classes and sections further apart. The outcome of this proposition will be watched with more than passing interest by all.

Demonstration Car For Southern Alberta

Will Be In This District in February or March

Arrangements have been completed for a campaign in South Eastern Alberta in the interests of a safer and more stabilized system of farming suited to the district.

In the present campaign, which is undertaken co-operatively by the Department of Agriculture and the Canadian Pacific Railway, an effort is to be made to carry the information that has been accumulated on this subject to as many as possible of those farming in this part of the country. The railway company is placing at the disposal of the department a first class car to be used for lectures and for illustrative material, and a baggage car to carry a supply of various kinds of seed. The car will be moved from place to place following a stop of a full day at each point. This will give ample time for visitors to see exhibits that are carried, to attend a meeting in the afternoon, and for a full discussion of any farm problems that are introduced.

The train is expected to be in this district the end of February or beginning of March.

FORMER REDCLIFF MAN KILLED IN ACCIDENT

Harold Hargreaves, a former foreman at the rolling mills in Redcliff, was killed at Port Angeles, Wash., on Dec. 29. He was caught by an endless conveyer belt on board a full scow. He was 52 years of age and is survived by a wife and three sons. Deceased was well known in Redcliff.

Beswick Burke Died Last Sunday Morning

Leaves Father and Seven Sons to Mourn Loss

It was a great shock to the people of Redcliff and surrounding district to learn that Beswick Burke, a young man who has farmed just north of town for the past three years, died suddenly in the Medicine Hat hospital last Sunday morning.

Mr. Burke was taken to the hospital a week before, suffering from internal troubles, and although in a critical condition it was hoped that by careful attention he would recover. Complications developed, however, and his weakened condition could not stand the additional strain.

Deceased leaves a family of seven sons, the youngest of whom is just seven years old. His death at this time is doubly sad as Mrs. Burke died a few years ago and the unfortunate children are now left without father or mother to guide their pathway. To them and their grandfather, Mr. C. A. Burke, also a widower, the sincere and heartfelt sympathy of the community goes out in this their hour of affliction.

Deceased was 46 years of age. The funeral took place yesterday afternoon from Nott's undertaking parlor, Medicine Hat. The service was conducted by Rev. J. W. Morrow.

G. W. V. A. MEETING

The regular monthly meeting of the G.W.V.A. will be held in the club rooms on Sunday afternoon next at 3 o'clock. A full attendance is desired.

Alberta Preparing For Rural Credit

Advisory Board is Appointed and Holding Meetings

The advisory committee on rural credits recently appointed by the appointed by the provincial government to go into the whole question, has been holding several sessions, and has been able to cover considerable ground already. Dr. Tory, of the Alberta University, who reported to the Dominion Government on the question, is a member of the committee and attended the sessions held last week. In the study of the various forms of rural credits in operation elsewhere, it has been found that to some extent the scheme of a purely government operation, under the direction of a government board or some such organization. This refers particularly to the system in existence in Australia, New Zealand, and in some of the provinces of Canada. It is found, however, that in the latest schemes of any also operating in the United States, there has been embodied many co-operative features, and that Denmark has a scheme that is entirely co-operative from top to bottom. In giving consideration to the broad basis upon which rural credits should be provided, as between nationalization and socialization by co-operation, the committee recognizes the truth of the principle that nationalization should be applied only in matters where the demand and the benefits to be derived are universal, and that on the other hand, where these are confined to one class, a scheme of co-operation is the soundest and most secure. Proceeding from this attitude, the members of the committee believe that any scheme of rural credits which is evolved should embody every possible feature of co-operation, and that the federal and provincial governments should be involved only to the degree necessary to ensure the successful operation of the scheme. The committee further recognizes what is equally vital to the success of any such scheme, namely, that the time is fully ripe in Alberta for the handling of credits and money, that the spirit of co-operation is strong among the people, and that they have ready ability though perhaps unconsciously, advanced to the stage where the organization of co-operative credits has been naturally and logically become the next step to the development in the province.

A. A. McGILLIVRAY TO SPEAK IN CLIFF HALL HERE TONIGHT

PROVINCIAL CONSERVATIVE LEADER TO SPEAK AT PUBLIC MEETING AFTER CONVENTION... NEW CANDIDATE AND OTHER SPEAKERS EXPECTED TO BE PRESENT.

The local Conservative Association has made arrangements to have Mr. A. A. McGillivray address a public meeting in the Cliff hall here tonight, at 8:15, immediately after the convention which will be held earlier in the evening.

Since assuming the office as provincial leader Mr. McGillivray has proven himself an energetic and enthusiastic leader. He is thoroughly conversant with conditions throughout the province and is a very able platform speaker. His criticism of present conditions and his suggestions for improvements in the future have been favorably commented upon wherever he has spoken.

It is seldom that Redcliff is visited by leaders of any of the several political parties. For this reason the Cameo theatre should be packed tonight to hear Mr. McGillivray.

It is expected that other speakers will accompany him here, and that the candidate selected at the convention will also address the meeting.

Military training for the 1st Alberta regiment commenced in town this week, under the command of Lieut. Hargrave. There are a fine lot of young men training this year. Parades will be held regularly each week.

FOUND—On Second St., a Ford car tire chain. Owner may get same at this office by paying for ad.

Dairy Pool Starts Operations

Officials of the Alberta Co-operative Dairy Pool announce that marketing of members' cream will commence through the agency at the beginning of the new year. The manufacturing part of the undertaking is to be handled through three creamery companies.

* * *

Alberta Man Wins Prize

The special prize of $50.00 offered by the Canadian National Railways for the Canadian steering the highest in timothy seed at the International show at Chicago, has been won by A. Lougheed, of Bowden, well-known Alberta registered seed grower.

* * *

Auto License Revenue

Revenue from auto licenses in Alberta during the year just closed has totalled $950,000.00. The number of autos for which licenses had been issued up to November included 52,356 passenger autos, liceries 478, motor trucks 2,056, motorcycles 331.

* * *

Road Program Complete in 1927

By 1927 the Alberta government hopes to complete its present main highway program calling for an expenditure of $5,500,000.00 by which a total grant of $1,500,000.00 will have been earned from the Federal highway fund.

* * *

New Bond Issue

The province of Alberta will have a new bond issue of $1,250,000.00 towards the middle or end of January, it has been announced. The past year has been one of the best for the sale of savings certificates since the sale of these began several years ago. At the end of November the total deposits for the year had passed the 2 million dollar mark.

* * *

Five Thousand New Members of Pool

A total of 5,192 new members have been added to the wheat pool of the provinces between December, 1924 and December 1925, adding a total of 504,000 acres to the pool.

* * *

Next Session of Legislature

The next and final session of the Alberta legislature before, dissolution will probably be called early in February.

* * *

Sugar Factory Production

The output of the new Raymond sugar factory following the first season's run, will be about 80,000 bags of sugar, from about 45,00 tons of beets. The run was not as heavy as first expected, but was quite satisfactory. The pulp and other by-products of the plant are to be used in stock feeding experiments.

* * *

Government Fur Sale

At the second fur sale conducted under the auspices of the game branch of the provincial department of agriculture, pelts to the value of about $2,000.00 in forty lots were disposed of, mostly local buyers.

* * *

Oil Development

There are approximately 80,000 square miles in Alberta that have petroleum possibilities, according to a reported statement made by Dr. Allan, of the University of Alberta. Development work included 96 wells completed and at August 1925, 15 wells were being drilled.

* * *

Labor Bureau Operations

According to a statement prepared by Labor Commissioner Smitten, the provincial labor bureaus have been brought to such a state of eficiency that in 1925 they were able to fill 98 percent of the orders received from employers for help of various kinds. This compares with a percentage of 87 in 1924. Of the men applying for work for whom positions have been found, the percentage during the past year was 84 compared with 68 in 1924. The cost of operating the bureaus has been reduced from $65,000 to $59,000 in the meantime.

Conservative Convention Here This Evening

Public Meeting After the Convention

Bills are now out announcing a Conservative convention to be held in Redcliff this evening at seven o'clock. The convention will be held in Cliff hall. It is called for the purpose of nominating a candidate to be the standard bearer for the party in the next provincial election.

At the same time a constituency organization will be formed and officers elected.

After the business of the convention is finished a public meeting will be held in the Cameo theatre at 8:15 and will be addressed by A.A. McGillivray, provincial leader of the Conservative party.

ST. AMBROSE CHURCH SPECIAL NOTICES

Lantern Lecture

There was a very fair attendance at the lantern lecture on Tuesday evening, when the story of "The Other Wise Man" was made the basis of an Epiphany service, including slides of the life of Christ, with hymns and carols for the season; and much appreciation was shown.

St. Ambrose' Choir Social

The Vicar and Mrs. Cooper entertained the organist and members of the church Choir at the Vicarage on Wednesday evening at the conclusion of the Epiphany services when a very pleasant time was spent in reasonable games and recreation, which were kept up till a late hour.

Mrs. Cooper's Concert

This long-planned event will take place in St. Ambrose parish hall, on Wednesday, when Mrs. Bredfineer has kindly promised to bring up a concert party, including soprano, contralto and tenor soloists, and also humorist. The programme will likewise include an amusing sketch, entitled, "The Mayor and the Manicure." Mrs. Cooper will contribute violin solos. The admission will be 50c, children 15 cents (or three for 50c from one family).

GORDON MEMORIAL UNITED CHURCH

The Annual Congregation Meeting will be held on Wednesday evening, Jan. 13th. Reports from the various organizations for the past year will be received and officers for the current year will be elected. Every person interested in Gordon Memorial ought to be present at the annual meeting.

Rev. A. Henderson, D.D., was the preacher last Sunday evening. The Doctor's sermon based on Rom. 5:1, "Peace with God through Justification by faith," was a clear statement of the Christian heritage, and the way in which it is obtained by the individual. The nations are being prepared for more liberal international peace through good will. The League of Nations, the Treaty of Locarno, the Disarmament conferences, all indicate the dawning of a new day, the day of Peace. Peace with God is the Christian's goal of Life. The way to that goal is falling into step with God with His plan for the individual life, by seeing by continual surrender of ourselves to God, which can be done only by a great act of faith.

On Tuesday evening, Jan. 5th, the senior group of the C.G.I.T. elected its officers for the coming year as follows:

Pres.—Bessie Sneddon.
Vice Pres.—Alice Carlson.
Sec'y—Margaret Moore.
Treas.—Margaret Dacre.

SCHOOL NEWS

Monday being the first day of school since the holidays the pupils arrived looking in first class trim ready for the ensuing six months until the close of school.

On account of the absence of Mr. King the high school did not commence until Tuesday. Needless to state, the boys were not received with wailing and gnashing of teeth.

On Tuesday a meeting of the Literary Society was held in the high school room, in the absence of Mrs. Stone the grades seven and eight were admitted to witness the election of officers for the ensuing half term. After a very closely contested election the following officers were elected: President, Lucille Berggren; Vice President, Viva Cox; Secretary and Press Correspondent, Len. Hicks; Editor, Isabel Cox. The meeting was then dismissed to allow the new executive to hold their first meeting. The following resolutions were passed: 1. That in an effort to raise the necessary funds to send the debating team to Blairmore, a dance be held within two or three weeks. 2. That the Literary Society be formed into the Redcliff High School Literary Debating and Dramatic Club. Membership cards will be issued on payment of the dues to the Secretary. All dues must be forwarded before January 8th of this week. 3. That grades seven and eight be allowed to enter on payment of the necessary dues and receive the usual first degree initiation test.

The meeting then adjourned until a later date.

Dinner in Honor of Dr. Andrew Henderson

A rather unique affair took place in Gordon Memorial church last Friday afternoon when the managers and their wives gave a dinner in honor of Dr. Andrew Henderson, who spent the Christmas holidays here with his brother, our esteemed citizen, Mr. Wm. Henderson.

About twenty-five sat down and partook of an excellent turkey dinner prepared by the ladies, after which the gathering took the form of a banquet when a number of toasts were proposed and ably responded to. The toast of the afternoon was to "our guest." In proposing it Mr. Mathews gave an interesting review of the life's work of Dr. Henderson, all of which was spent in the ministry, and who despite his four score years, still took an active interest in the work of the church and faithfully performed the duties devolving upon his present office.

In reply Dr. Henderson said it was the first time he had ever been called upon to reply to a toast under the heading and he esteemed it is a great pleasure that this honor should be bestowed upon him in Redcliff, the home of his revered and loved elder brother. Although it was his maiden speech to a feast of this kind, the guest proved himself quite equal to the occasion, and he gave one of the best after dinner addresses heard here for some time. While liberally punctured with amusing incidents of his career, it also touched upon the more serious side of life, in which the speaker referred to the great influence of the home, the church, the school and the press in moulding the character of the young people of any community.

Tribute to the old year by C. Buckingham, who was year by E. H. Sothern, the pioneer; by A. N. Collard and Wm. Henderson, and the ladies by E. L. Stone and Mrs. Allard, found a place on the program and received due attention from the diners. Instrumental and vocal selections were rendered by Miss McLean and Mrs. Stone.

During the afternoon photographs of the party were taken by C. T. Hall both at the tables and outside the church.

On the whole the event was a great success.

Red Cross to Meet Friday Afternoon

A meeting of the local branch of the Red Cross Society will be held in the Review office on Friday afternoon of this week, commencing at three o'clock. As new officers for the coming year will be elected and other matters of importance will be discussed, a full attendance of all interested is urgently desired.

Deposit C.M.R. Colors In St. Barnabas Church

Impressive Ceremony is Presented for the Occasion

Conveyed by a color party to St. Barnabas church, the flag presented to the 3rd C.M.R. by King George was deposited in the church last Sunday morning with the impressive ceremony prescribed for such an occasion. The 1st A.M.R., which regiment perpetuates the 3rd C.M.R. paraded at the armory on First St. and marched with the Color Party, headed by the Medicine Hat Pipe Band, to the church. The centre section of the church had been reserved for the veterans who filed into their seats as the color party proceeded towards the altar. The flag was handed over to Rev. W. C. Weston, whereupon the party sheathed their bayonets and took their places in the body of the church and the church service proceeded.

Major Sneddon and a number of other old members of this regiment from here attended the service.

When you drink BOVRIL you drink BEEF

Canada As A National Unit

The conference held in Winnipeg last month of two hundred representatives of Boards of Trade and Chambers of Commerce from every province in Canada, and called together for the avowed purpose of frankly discussing the economic situation and needs of Canada, and from which discussion all partizan, political considerations and controversies were rigidly excluded, given promise of having inaugurated a new era in the discussion and consideration of practical questions and problems. At the concluding session one delegate characterized it as the "second Canadian confederation," and, apart from the important resolutions, all unanimously adopted, provision was made for the continuation of the work of the conference by the forming of a Dominion Board of Trade.

There was plain speaking at the conference, and no minimizing of the extent of the problems and difficulties at present confronting the Dominion, but, in all respects, there was a pronounced note of confidence in Canada and in the courage, ability and determination of the Canadian people to work out their own and their country's salvation. Canada has progressed greatly during the first fifty years of confederation, but the conference was agreed that in the years just ahead of it will be found its great opportunity, which, if fully grasped, will lead to a future of brilliance, abounding development and prosperity.

The object of the conference was to bring together representative business men from the Maritime Provinces, Ontario and Quebec, the Prairie Provinces, and British Columbia in order that the problems or grievances and the economic outlook of each of these four main sections might be frankly presented and just as frankly discussed in the hope that as a result a better understanding might result and a spirit of give and take, of compromise, of willingness to get together be developed. The conference was unquestionably a success in these respects.

The economic situation in the Maritime Provinces received lengthy and sympathetic consideration, and it was generally agreed that action should be taken to help solve the problems at present confronting that portion of the Dominion. Maritime representatives strongly urged that it was essential that steps be taken to encourage the use of Canada's Atlantic seaports, and the diversion to these ports of much of the Canadian traffic now going to world markets through the United States. On the other hand the special growing importance of trade via the Pacific route and the Panama Canal to Europe was outlined. Then, between these two, the case for the development of the St. Lawrence and Great Lakes waterways to enable ocean-going vessels to come well into the interior of Canada and Great Lakes vessels to proceed overseas without breaking bulk, as well as the advisability of a Hudson Bay route were presented. In time, no doubt, all these routes will be fully utilized, but the question now is, apart from purely political or sectional considerations, which offers the most immediate and greatest beneficial results to Canada as a whole.

In regard to another question, however, namely the coal mining industry, it was found that the interests of the Maritime Provinces and Alberta are largely identical, and one of the gratifying results of the conference was a joint meeting of men from these two widely scattered sections to draft a resolution covering this question, not from a Provincial or local point of view, but from a broad national standpoint.

The conference likewise disclosed a wonderful unanimity of opinion on the subject of immigration. Far East and Far West united with the more central Provinces in declaring that Canada's greatest need was more population in order to lead to a more satisfactory prosperity, to help solve our complex railway and transportation problems, and to develop the wealth of national resources of which Canada can boast. There was equal unanimity in declaring that recent administrations at Ottawa have been neglectful of the essential national work of immigration, and an unequivocal demand made for the inauguration and prosecution of a most aggressive immigration policy.

Tangible results may be expected from the conference, but its greatest value will doubtless be found in the promotion of that better understanding between all sections of the Dominion which was the basic idea underlying the holding of the conference. It is well not too much to hope that the conference has given marked impetus to the development of that more intangible thing which Canada has lacked, and the lack of which has been causing real concern and even jeopardizing the future of the Dominion, namely, a national spirit.

The Winnipeg conference thought and acted nationally in a way that even the Dominion Parliament has seldom achieved. This, in itself, holds promise of much future good for Canada.

New Transportation Device

Snowmotor Can Negotiate Roads Other Vehicles Cannot Use

During the coming winter Canada will see the debut of a new transportation device known as the snowmotor. This consists of two hollow cigar-shaped cylinders or drums to which flanges, resembling cork screws, are attached. These drums are fixed to an automobile or tractor in the place of the wheels and, by rotating, actually float the machine over the snow. The snowmotor is regarded as especially valuable in the transportation of lumber. It can negotiate snow of any depth and can operate in countries where other methods of transportation are impossible or too costly and can also make roads which other vehicles can use. It is manufactured in Detroit and will be on the market in Montreal during the coming winter.

China produces about 60,000 long tons of unshelled peanuts in a year.

In the cooking class of apples at the Imperial Fruit Show the Ontario Fruit Growers' Association has won first prize and the Associated Growers' of British Columbia, second and third prizes.

Cuts and Bruises Disappear.—When suffering from cuts, scratches, bruises, sprains, sore throat or any of the similar ailment, use Dr. Thomas' Eclectric Oil. Its healing power is well-known in every section of the community. A bottle of Dr. Thomas' Eclectric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

Horses Going Into Discard

Farm and Ranch Review, in reviewing the statistics of horse population in Canada, says that 20 to 30 per cent. of the present farm horse stock will go into the discard within five years, and the young stock is not there to take their places.

Minard's Liniment for chilblains

Impressed By Canada

Has Best Climate In World Says British Visitor

England is rather in the basement as to climate, while Canada is on the best floor of that great house, the British Empire, said Lady Cowan, a distinguished British visitor in Toronto, who gave a brief address at the meeting of the Municipal Chapter, Daughters of the Empire.

Lady Cowan has travelled almost across the Dominion and has met many hundreds of Canadian women. She expressed the greatest admiration for the wonderful work they were doing for the Dominion and for the empire.

"I was a lover of the empire before I came here," she said, "but I do not think I am putting it too strongly when I say that I am thrilled with what I have seen of Canada."

Sour Stomach Risings Subdued by "Nerviline"

A Few Drops Bring Relief

The wonderful relief you get from twenty drops of Nerviline will surprise you. Take it in sweetened water, and almost immediately you feel better. Nerviline brings up the gas caused by fermenting food, and relieves that distressed feeling in the stomach. When colic or cramps strike you at night, Nerviline is a sure relief. For general use in the family, for emergent ills, always keep trusty Nerviline on hand. 35c at all dealers.

Expect Busy Lumbering Season

The trek of business to the woods has commenced and already a large number are at work. Operators are expecting a busy winter, and so far have had no trouble in recruiting labor. Already supplies to the value of $10,000 have been forwarded to the camps of the various pulp and paper companies, and private operators in the Thunder Bay district.

RHEUMATIC PEOPLE NOW FIND RELIEF

By Driving the Poisonous Acid From the System

Rheumatism attacks people, when the blood is thin and watery or charged up with impurities, thus settling the inflammation of the muscles and joints. Cold, wet weather or sharp drafts may start the pains, but the cause is rooted in the blood, and to get rid of it one must be "master through the blood. As a blood builder and nerve tonic Dr. Williams' Pink Pills are unsurpassed, and for that reason they do not fail to give relief to rheumatic sufferers when given a fair trial. Among the rheumatic sufferers who have proved the great value of this medicine is Mr. J. M. Foley, Wilsboro, N.S., who says:—"My trouble started with a bad cold, the result of working in heavy rainstorms. From that it developed into rheumatism which badly crippled me and kept me confined to bed for upwards of six months. The doctor who treated me did not help me, and every friend who called to see me had something different to advise. Some of these remedies I tried; but with no better results. My legs were stiff from the hips down, and every move I made caused intense pain, and constantly I was growing worse. One day a friend from Falmouth, who came to see me, asked if I had tried Dr. Williams' Pink Pills. I had taken so much medicine without benefit that I was skeptical and said so. My friend, however, had so much faith in the pills that he got me a supply and to please him I began taking them. I had not been taking them long when I began to feel a change for the better, and I gladly got a further supply. Soon I was able to get out of bed and walk around on crutches. Still taking the pills, I used in all seventeen boxes, by which time I was a well man and at work every day. Now I always keep a box of Dr. Williams' Pink Pills in the house and if I feel an ache or pain I take them, and always with good results. I believe I would still be a bed-ridden cripple but for these pills, and I shall always praise and recommend them."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

British Industries Fair

Canadian Manufacturers Will Send Exhibits to Show in England in February

Many Canadian manufacturers will send exhibits to the British Industries Fair, which opens some time in the end of February, and which will be visited by between 40,000 and 50,000 buyers from all parts of the world, according to F. W. Field, senior British trade commissioner for Canada and Newfoundland. The great fair will be held simultaneously in London and Birmingham, and is now the largest annual trade fair in the world.

Binder Twine Used in Canada

To bind her huge grain harvest, Canada now uses annually an average of from 80,000,000 to 100,000,000 pounds of twine, and ranks second only to the United States in her total annual consumption.

Running into debt may be a pleasure, but running into one's creditors isn't.

Mothers Treat Colds The New "Direct" Way

No Longer Necessary to "Dose" Children With Internal Medicines to Break Colds.

Children's digestions are easily upset by too much "dosing." Vicks VapoRub being externally applied, does not upset little stomachs.

At the first sign of croup, sore throat, or any other cold trouble, apply Vicks freely. There is nothing to swallow—you just "rub it on."

VICKS VAPORUB

OVER 21 MILLION JARS USED YEARLY

International Livestock Exposition

Good Representation From Canada at Big Show in Chicago

The farmers of Canada are very largely represented in competition with the best that the United States can produce at the International Live-stock Exposition at Chicago. Last year Canadian exhibitors swept the boards in the hay and grain show and also won some of the most coveted blue ribbons for horses, cattle and sheep. The most outstanding victory won by Canada last year was when J. C. Mitchell, of Dalnida, Saskatchewan, won the world's wheat prize, making the third time he had scored this honor, and the thirteenth time that Canada had won it in the fourteen years the competition has been held. Mitchell's prize bushel of Marquis wheat was the best in over 600 displays from all parts of the United States and Canada. He is competing this year and has hopes of winning again.

H.R.H. the Prince of Wales is entering his famous Shorthorn bull, "King of the Fairies," with which was championship winner at this year's Royal Winter Fair in Toronto. This bull, which is being sent from the Prince's ranch near High River, Alberta, won a championship at Chicago last year. It has won championships in the most important livestock shows in Western Canada and has been awarded a gold medal by the British Shorthorn Breeders' Association.

At last year's International Show, Canadian grains and seeds captured 152 prizes including the world's championship for wheat, and the highest awards for oats, barley, flax, alfalfa and field peas, 25 out of the 26 premiums for hard spring wheat and 24 out of 26 in oats.

During the years one of the attractions at the show will be the Canadian Government exhibit showing the great variety of products of the farms and orchards in all parts of Canada and indicating the opportunities of the Dominion offers to settlers on its fertile lands. 240,000,000 acres of which still await settlement. The International Show will be held from November 29th to December 8th inclusive.

Long Standing Asthma. Many have suffered so long from asthma and have tried so many so-called remedies they think that there is no real help for them. They should read the letters published by the manufacturers of Dr. J. D. Kellogg's Asthma Remedy from hundreds of cases once as desperate as their own. Even in long-standing cases this famous preparation brings prompt help.

The Age Of Man

Roy Chapman Andrews, naturalist and explorer who returned recently from an expedition into Asia, declared in an address at Milwaukee that scientists expect to prove to the world by skeletons that man existed 50,000 years ago.

Canada produces no tin ore. Though the occurrence of tin-bearing minerals has been noted in a number of localities, they have never yet been found in sufficient quantity to be of any economic importance.

"Three Little Maids"

New Theatrical Offering By Capt. Plunkett To Be Produced in the West

For seven seasons, ever since the Dumbells' Revues began their record-breaking Canadian tours, Capt. N. W. Plunkett, the producer, has been besieged with requests for more theatrical offerings of the same high standard—particularly musical comedies. Capt. Plunkett was determined, however, that he would not add to his theatrical enterprises until he was personally convinced that his second series would be as outstanding an event as his first was.

"Three Little Maids," the London and New York musical comedy success was the choice. Its tour marks the inauguration of a new policy. "Three Little Maids" is crammed with good comedy and unusual music. Its songs are classed by critics as "the most beautiful in a generation."

Capt. Plunkett has given the play a magnificent production. Scenic and lighting effects were specially designed and Capt. Plunkett has contrived an introduction that peculiar speed and sparkle which is a unique characteristic of all his productions. Western dates are as follows:

Walker Theatre, Winnipeg, Tues., Dec. 1, to Sat., Dec. 5; Regina Theatre, Regina, Mon., Dec. 7, to Wed., Dec. 9; Empire Theatre, Saskatoon, Thurs., Dec. 10, to Sat., Dec. 12; Empire Theatre, Edmonton, Mon., Dec. 14, to Wed., Dec. 16; Grand Theatre, Calgary, Thurs., Dec. 17, to Sat., Dec. 19; Orpheum, Vancouver, Mon., Dec. 21 to Wed., Dec. 23; Royal Theatre, Victoria, Thurs., Dec. 24, to Sat., Dec. 26.

Corns disappear when treated with Hoffman's Corn Remover without leaving a scar.

Voice Starts Automobile

Claims Electricity Can Be Controlled By Spoken Demand

A Nottingham inventor claims that he has an invention by which electricity can be controlled on spoken demand.

This inventor, L. H. Pearson, states that the device consists of an apparatus for transforming the sound waves in such a way that they operate and control an electric circuit.

The invention has been patented as "Pearson's Acoustic Control," and at a demonstration given at the electricity exposition seemed remarkably successful.

She Could Never Do The Things Other Girls Did

Miss I. J. Ross, Scollard, Alta., writes:—"I am only twenty years old, but have suffered from heart palpitation and nerve trouble for several years.

I could never do the things other girls did, that is, in the line of sports, skating, etc., and could never depend on myself at work.

About six months ago I began taking

MILBURN'S HEART NERVE PILLS

and am just twice the girl I was, and can enjoy everything in general life so much more. I am very grateful for what your Pills have done for me."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

Indian Woman Dies On Hunting Trip

Widow of Quebec Trapper Was Hundred Years Old

Mrs. Peter Thomas, widow of an Indian trapper, of Lake Kledeking, Quebec, died suddenly while hunting, according to a verdict of a coroner's jury. She was supposed to be 100 years of age.

Mrs. Thomas lived in a camp near the lake and a few days after she left for her last hunting trip her canoe was found upside down and full of game. The body was found in the lake, a few yards from the canoe, and it is thought that Mrs. Thomas died of heart failure while hunting.

Ban German Goods

The Toronto board of education has prohibited the purchase for use in schools of any goods manufactured in Germany or in any of the countries allied with it in the Great War.

Most of the barytes produced in Canada comes from large vein deposits of this material in the vicinity of Lake Ainslie, in Inverness County, Nova Scotia.

It appears that an experienced father has come to the front with an explanation of radio howling. Radio, for sure, is still in its infancy.

Stop that cold with Minard's Liniment

Radium Found By Mechanical Bloodhound

University Professor Constructed Device Which Located Lost Tube

Six weeks patient search with a mechanical bloodhound has resulted in the finding in a newer pipe of a tiny tube containing $986,000 worth of radium which disappeared from a hospital at St. Paul, Minn. Professor A. E. Hendricksen, head of the physics department, University of Minnesota, constructed the finding chamber detectors which were attached to electroscopes and began to hunt along sewer leading from the hospital.

The detectors led him to a nine-inch pipe in a sewer tunnel. The radium tube was found within two inches of a mark he made on the pipe.

Recognize Osteopathy

Canadian Osteopaths May Be Granted Full Recognition

Dr. E. O. Millar, of Montreal, speaking on behalf of the Canadian Osteopathic Association at Toronto, stated that a bill was to be put through the Dominion Parliament this winter, in the shape of an amendment to the Dominion Medical Act, according doctors of osteopathy full recognition, in that they possessed the same qualifications as the older medical profession.

Feverish, pale, restless and sickly children owe their condition to worms. Mother Graves' Worm Exterminator will relieve them and restore health.

Canadian Historical Stamps

New Issue Will Shortly Be Placed On Sale

According to an announcement by the post office department, the first of a series of Canadian historical stamps is soon to be issued. The new issues will be three in number—one bearing the portraits of Baldwin and LaFontaine; a second, the portrait of Thomas D'Arcy McGee; and a third, the portraits of Sir Wilfrid Laurier and Sir John Macdonald. In addition to their educational value," says the department announcement, "they are also likely to be widely sought and highly valued by stamp collectors in different parts of the world."

They asked his father for a definition of honesty. "I will explain to you, mine son," said the parent. "Suppose you vas in business and vent to the bank to cash a check for $40 and der cashier gave you $50. Vell, mine son, if you gave five of dot extra ten to your partner, dot vould be honesty."

Genuine Aspirin Proved Safe

Take without Fear as Told in "Bayer" Package

BAYER

Does not affect the Heart

Unless you see the "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Tablets of Aspirin proved safe by millions and prescribed by physicians over twenty-five years for

Colds	Headache
Neuritis	Lumbago
Toothache	Rheumatism
Neuralgia	Pain, Pain

Each unbroken "Bayer" package contains proven directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100.

An Exchange Of Farmers

Great Britain Sending One Hundred to Tour South Africa

Great Britain is making an exchange of farmers with South African cultivators. Last summer a delegation of agriculturists travelled from Cape Town to England and studied methods used there. On their return they published a souvenir of their tour, sending a copy to the British sovereigns, which their Majesties were "graciously pleased to accept," at the same time expressing the hope that farmers of England would return the visit.

Arrangements to this end have now been completed and the South African National Farmers Union is already preparing to welcome tillers of the soil from Great Britain and the Irish Free State. The British minister of agriculture has associated himself with the scheme, and a tour of the Union and Rhodesia is planned. The excursion will be limited to actual farmers. South Africa desires to show the visitors what her comparatively sparse population has accomplished in agricultural development of the country and at the same time demonstrate the vast natural resources of the land.

The visiting farmers will travel in special trains to many parts of South Africa, the tour covering more than 6,000 miles. There will be a stop at Victoria Falls on the Zambesi, one of the great waterfalls of the world, and opportunities will be given to see something of Rhodesian cultivation. It has been arranged for the party to leave Southampton early in February and return about the last of April, the time coinciding with the most active farming season.

Wild Animals Lose Fear of Man

Denizens of Canada's National Parks Have Become Quite Tame

Each succeeding year's round of tourists bring new expressions of wonderment and surprise at the rapidity with which the wild animals in the Canadian National Parks are losing their fear of man. Parks' officials, who administer wild life protective measures, have watched this condition develop and to them it was to be expected, but to the tourist new to the parks the holding up of cars on a park highway by a band of friendly Rocky Mountain sheep is a novel experience.

Visitors to Rocky Mountains park in Alberta are always sure to have amusing views of mountain sheep and other wild animals at different points on the highways, and bears are frequent visitors to the outskirts at most of the towns in the parks. In the past year or two, elk, among the most wary of animals, have been reported to have made their appearance on the golf links at Banff while play was in progress. In the early part of October of this year about fifteen elk trotted out of the skirmish of the fifth hole on their way from the Bow River to the upland forests. These exhibitions of animal friendliness are not confined to Rocky Mountain parks. In Jasper Park, on the occasion of Sir Douglas Haig's visit in July of this year, two young black bears interrupted the Field marshal's game by their appearance on the links.

The growth in number of wild animals in the parks and the ease with which they may be encountered and photographed is year by year becoming a greater attraction to tourists.

Girl Takes Public Office

Was Popular Choice For Mayor of Dunstable, England

Miss Ivey Dukes has been elected mayor of Dunstable, Eng. Her father cast the only vote against her. He has been mayor for one year, and his daughter performed all the duties of the job, but he opposed her taking office on her own account.

Asked if he wanted the job again himself, he replied:

"Oh, no. I have had enough and would not take it again in any account, and I oppose my daughter's election out of sympathy for her."

Lions Annoy School Children

Lions, terribly abundant numerous in Northern Transvaal, are causing much trouble for the farmers. Children going to school have been frightened by the beasts and special protective measures have been taken. Forty lions have been killed within the last three months in one district, where they had raided cattle herds and damaged the crops.

Canadian Asbestos

Canadian asbestos, which is the chrysotile or serpentine variety, is of the finest quality, and, on account of its softness, silkiness and tensile strength, is in great demand for all kinds of asbestos products, but particularly for asbestos wallboard.

W. N. U. 1705

Where Silence Is Compulsory

No Noise Allowed During Siesta Hour in East Indies

The Siesta hour in the tropical East Indies is sacred. Woe to him who violates it. Everywhere, says Dorothy Dix in "My Trip Around the World," notices are put up on the walls requesting guests not to talk between the hours of two and four, saying that "dogs will not be permitted to bark nor children to cry." How do you suppose they train dogs and children to obey these notices? If you speak above a whisper, a long, sibilant hiss, like a snake's, runs the rounds of the verandahs. Once I heard a baby give one wail, and no more. It was cut short.

They tell of the horrible fate that befell a rash young American, who foolishly imagined that he could violate a holy institution and get away with it. It seems that this bold youth had a typewriter, and he undertook to pick off some letters during the siesta hour. The management sent him a polite message requesting him to desist and telling him that it was not permitted to make any noise between two and four o'clock. The young American replied that he was sorry, but the mail boat was leaving the next day and he had important business letters that he must get off. He clicked cheerily on.

About two clicks more. That was all. The proprietor, followed by three or four servants, arrived on the scene, and before he knew what had happened the young American, his typewriter and his baggage, were out in the street together, and the door behind him was locked. And it's no joke to be thrown out of a hotel when it's the only one for several hundred miles.

Buckingham Palace Reaches Centenary

Queen Victoria Was First Sovereign To Occupy It.

This year marks the centenary of Buckingham Palace as it stands today. In 1825, George IV. decided to convert the residence then known as Buckingham House into a palace. The King died before it was completed, and not until 1837—when Queen Victoria went to live there—was it occupied by a sovereign. William IV., it seems, had no liking for the new palace and preferred to live elsewhere. Improvements have been made from time to time, and during the reign of King Edward there were numerous and rather drastic. Queen Victoria and the Prince Consort entertained lavishly in this respect the palace was not unlike the exact opposite of her grandmother, Queen Charlotte. At one time the palace entrance and exits were guarded in a very stark manner. A boy named Jones claimed to have entered the private apartments and to have listened to a private conversation between the Queen and her husband. This prank on the part of "Tod-go Jones," as he was nicknamed, resulted in the more stringent protection of all entrances.

Would Boost Lumber Trade

To Seek Prairie Markets for British Columbia Lumber

An extensive advertising and sales campaign for British Columbia lumber products on the prairie provinces is the proposal of lumber dealers in Alberta, Saskatchewan and Manitoba, it was announced by A. K. Godfrey, provincial retail lumber man of Winnipeg, speaking at Vancouver. "The time is ripe for an aggressive selling campaign, and the retail trade realizes it," the speaker said.

Mr. Godfrey's views were endorsed by Walter Thorn, a retail lumber man of Moose Jaw, Sask., and by Theodore Sparks, of Winnipeg.

Canadians Are Returning

Figures Show That Large Numbers Are Returning to Homeland From U. S.

In the first nine days of October, 732 former Canadians, who have lived in the United States for more than six months, returned to Canada, according to the department of immigration and colonization. In the same period, 479 actual immigrants came to Canada from the republic. That the returning Canadians were people of substance is indicated by the fact that in one week those returning through nine government offices in the United States brought back with them $205,200.

Sure Sign of Trouble

How to read the future: "If you smell gas escaping and look for the leak with a lighted match, it is probable that you are going on a long journey. If your wife's name is Ethel, and you surname "Smith" is your sleep, it is a sign that you are going to have domestic trouble."

Another good warning of love troubles would be a wrecked car conspicuously placed.

Solve Mysteries Of World War

Still Uncovering Bodies of Soldiers Listed As "Missing"

Seven years have passed since the armistice was signed, but the blood-stained soil of France still covers the mystery of thousands of soldiers carried on the rolls of the French ministry of war as "missing in action."

A large part of the old battle zone has been reclaimed and the field upon which men fought for four years has been returned to crops. In the process, the farmers of France have covered thousands of miles of trenches, wound tens of thousands of miles of rusted and torn barbed wire, filled in shell craters and removed with care the unexploded engines of war which unfortunately, only too frequently explode in the hands of these brave peasants and add more names to the death toll of the war.

These farmers also have succeeded in finding the bodies of thousands of French, American, British, Canadian and Germans, who fell in conflict and were covered by a scattering of earth by their comrades or by an exploding shell or who, badly wounded, crawled by instinct into a copse where death overtook them and they remained hidden from the squads who searched the battlefields after each engagement.

Popular Spot in Scotland

Every Year Many Thousands Visit Birthplace of Robert Burns

Burns' birthplace at Alloway is a popular spot in the land of heather. During the year ended September 30, the number of visitors was 59,344, being 126 fewer than in the previous year. At the monument 59,345 people passed through the turnstiles, an increase of 4,551 as compared with the previous year. The Glasgow fair week was the busiest of the year, the number of visitors to the monument for the week reaching 7,114.

Mr. Van Peste.—"Whom would be a good week for us to come and visit you and bring the children?"

Long-Suffering Victim.—"About December."

"Sorry, but we'll be out of the state during the month of December."

"So will we."

One of nature's intimate works of grandeur—Cathedral Rock, Grade's Parish, Bermuda, and the S.S. Hopkinpool which makes her weekly visits to the island winter from New York.

From the depths of the Atlantic five hundred miles from land, some huge sub-oceanic mountain's peak breaks the surface in a chain of little islands curved for 14 miles in the form of the letter J, called The Bermudas.

They are alone in smiling frankness on the flat face of the sea, quaint in design with their belt of rough grey coral at low tide, capped by the green grass cover, and studded with quaint white houses; here and there a Yew-tree, strong and sinewy in the trunk, hardy and tough in its evergreen. For in the Bermudas it is as mild in spring from Christmas day to Christmas day.

At the western end the colony is more gathered, and houses seem to crawl like white insects up and down the green slopes. Then the Islands where the Indian fig, linked by bridges each to each (as attractive as a Japanese firecracker print) around the bay gleaming with many colors, to the naval dockyard at the eastern point; a concrete back, with the world's largest floating dock.

Inside the bar the heavy blue of the bottomless water is smudged with the purple of submerged coral reefs. Then the colors lighten to cooler shades, to jade green above the shallows, to the yellow of the sand, speckled with dots of scarlet, black and white, where a tiny buoy or toy-like lighthouse marks a spot of sudden danger.

To this paradise, in quest of the world's end, came the explorers four hundred years ago, suffering ship wreck on a rock to the north; and Shakespeare wrote in monument his "Tempest" with "the much vexed Bermoothes" as his setting. Along the northeast skyline are the largest reefs, waiting only for a fresh breeze to gash them into a foaming, tumbling mass of white.

Once a stumbling block to the discovery of land, the Bermudas, to-day, then the incentive to an immortal poem, the Bermudan Islands are now calling with their own voices, safe from the seasons, granted from the storms, freed from the rattle of civilization (for motor cars are prohibited among the delicate scenery) they form a quiet harbor of rest and contentment. Indeed a happy archipelago.

The Canadian Pacific liner "Montroyal," making the cruise to the West Indies this winter, will be in the Bermudas towards the end of February and again late in March while on the second trip.

Silver Foxes Eat Fancy Fowl

Guards Solve Mysterious Disappearance of Twelve Valuable Chickens

How $2,400 worth of silver foxes, transported to Europe for breeding and exhibition purposes, devoured $720 worth of fancy fowl on the way over was told by the crew of the United States liner George Washington, which returned to New York from Bremen.

About 700 chickens, each valued at $65, and the foxes had been assigned to the same freight compartment. Guards travelling with them found that each time they counted the fowl one less was accounted for. At length a heavier guard was established and it was discovered that two of the expensively coated regnards, each worth $1,200, had broken through their cages into the coops and had feasted on twelve chickens.

Ancient Monarch of the Forest

Cedar Tree, 2,300 Years Old, in the State of Washington

Washington's oldest inhabitant, a cedar tree 2,300 years of age, has been spared the axe through the generosity of nature lovers of this state. It stands 200 feet high, is 58 feet in circumference and 15.4 feet in diameter.

The Washington Natural Parks Association raised $2,000 by popular subscription to buy the monarch, together with 20 of its companions, which stand 35 miles from Seattle. The land occupied by the grove will be set aside as a state park.

The Judge Knew Him

In a Maine town the champion local liar was brought before the justice of the peace for stealing a hen. It was a pretty plain case, and, on the advice of his lawyer, the prisoner decided not to argue about it.

"I plead guilty, judge," he said.

"Hiram," said the judge, "I guess I'll have to have more evidence before I can sentence you."

During the first nine months of the current year there was 161,527,000 pounds of herring taken from the sea fisheries of Canada. As caught and landed the fish were valued at $1,292,000. Among the many uses for the herring is that of bait for which 213,174 barrels were thus consumed.

"Little Havens of Perfect Happiness"

Where Saul and David Fought

Excavations By Palestine Expedition Uncover Interesting Collections

Excavations of forts and battlegrounds where Saul and David fought the Philistines are described by Alan Rowe, field director of the Palestine expedition of the University Museum of Philadelphia in a report which was made public by Dr. George Byron Gordon, director of the museum.

Fortresses, successively occupied by the Egyptians, Philistines and Israelites have been unearthed on the top of the hill of Beth-Shan near the Jordan, laying bare the wall on which the Philistines hung the body of Saul. The interior of the wall is blackened by an ancient conflagration believed to have been set about 1,000 B.C., as part of the revenge for the death of Saul which was wreaked on the Philistine city by David after he conquered it. A quantity of baked clay objects belonging to the cult of Astaroth have been collected among the remnants of a building, which is apparently the temple of Astaroth, where, according to I. Samuel, the armor of King Saul was hung.

Gambling With Ice Cream

Spanish Street Vendors Give Chances For Free Treat

In our country ice cream is a temptation by itself, but in Spain there is added to it the temptation to gamble, if bought from a street vendor. On top of the slug pail that holds the cream is a small wooden plate above which is poised a revolving stick. Round the edges of the plate, which is gaily colored, graded numbers from ten to one hundred are painted. The intending purchaser pays the vendor a penny, which entitles him to one twist of the stick. If the pointer indicates a number higher than that made by the stall-holder, the winner is entitled to an ice cream free of charge and another twist of the stick. With luck, and provided the game is played fairly, one can have a succession of ices for the original penny. If the stall-holder wins in the first instance the penny is lost and the customer receives nothing. These barrows are a source of interest to students, who spend most of their spare cash in attempts to defeat the ice cream man.

Nothing But Respect

Only Thing Drug Traveller Knew Firm Had For Gray Hair

The young man with the flushed face felt very proud of himself. It was only natural that he should do so, for he had been promoted to the position of chief traveller for a firm of wholesale druggists and, further, he had the use of a car.

For the benefit of this story it is essential to note that the young traveller was an honest and truthful young man. His first business call took place in a drug store in a watering place. He already had a lengthy list of goods on order when the white haired druggist inquired:

"Has your firm anything for gray hairs, young man?"

"No, I'm afraid not," came the astounding reply. "Nothing but the greatest respect."—Boston Herald.

Remains Of Extinct Mammoth

Wonderful Exhibit In National Museum at Washington

A small tent tube and panel on exhibition in the National Museum at Washington constitutes one of the most wonderful exhibits. They contain some of the hair; muscular tissue, fat, blood and stomach contents of a giant mammoth which died 50,000 years before the birth of Christ. A few years ago a party of Russian explorers dug into an ice bank on the Berezovka River in Siberia and there found the remains of an eating animal in a remarkable state of preservation. The skin was so perfect that it was easily removed. Some of the hair measured 20 inches. Analysis of the stomach contents showed grass and flowers of the same types that grow in Northeastern Siberia today.

Greatest Asset On Farm

There is one thing about a dairy cow. If you have a mine and you cut out the ore, the productive value of the mine is gone. But a dairy cow may return you $125 worth of products one year and repeat it the next, and the next, and the next. Besides that she adds to the fertility of the land all the time. The dairy cow is the mother of all humanity. Treat her right and she is the greatest asset on the farm.—Amherstburg Echo.

Use Eggs As Currency

Eggs are being used as currency in the Kara Kola district of Armenia. Twelve eggs are accepted on their "face value," as equivalent to one ruble, or fifty cents in Canadian currency. If any of the eggs prove bad, they may be returned as "illegal tender."

Alberta's Growing Poultry Industry

Rapid Expansion As a Mixed Farming Province Is Noted

Alberta's rapid expansion as a mixed farming province in recent years has brought about a development of other branches of farming hitherto neglected, especially that of poultry raising. Three years ago this province was a heavy importer of eggs and other poultry products in order to meet domestic requirements, but the farmers, realizing that poultry raising was a valuable adjunct to their regular activities, have lately increased production to such a degree that the province has now become an exporter. Last year, it is estimated the province produced over 29,000,000 dozen eggs of a value of $5,796,000. In addition some 5,300,000 pounds of live and dressed poultry, valued at $1,120,000, were handled by commercial houses, making a total production for the year of $8,196,000.

This splendid showing is largely due to the activities of the provincial co-operative marketing service, which has now been functioning for about five years. A campaign for more intensive poultry raising, sponsored by this organization, brought about a ready response, as is evidenced by the substantial increase each year in the number of poultry on Alberta farms. In 1921 the number of poultry in the province was 4,962,585. The following year the number had increased to 5,422,139 and in 1923 had further increased to 6,650,163. Last year a new high mark of 7,214,819 was established.

Exercise That Is Cheap

Walking Has Given Place to Expensive Gymnasium Equipment

Are not Canadians and Americans becoming the laziest people on the face of the earth? Our kinsmen across the sea are real walkers. Children walk to and from school one, two and three miles away, men walk to and from their work, two, four or six miles from their homes, on Saturday afternoons and Sundays they walk four, eight or twelve miles for the sake of their health. And nobody thinks it strange while writing to their newspapers about it. When they want a real walk they take from London to Brighton or from Manchester to Blackpool, a matter of fifty miles or so. Here, our young folk simply must go by auto or ride a wheel to and from any place over a mile away (or even less), and in order that their bodies may get some necessary exercise, thousands of dollars are spent on gymnasia, equipment, athletic grounds, uniforms, coaches, etc., in school, churches, clubs and institutions. There is enormous waste in duplication of such facilities, a great deal of which could be done without if hiking clubs were substituted for sports clubs.

Never Mastered English

William the Conqueror Could Not Speak Language of Subjects

Did you know that William the Conqueror never learned to speak the language of his English subjects? Although he ruled England for more than twenty years after the battle of Hastings and made many laws and many important changes in the form of government, William I. never mastered the Saxon English.

At one time he decided to study the language of his subjects so that he would be better able to administer justice in person and without the help of an interpreter; but the old English was no easy language to master, and William was always busy quelling rebellions and trying to keep order in his newly-conquered and unruly realm. Probably, too, he was no natural linguist; and the Norman nobles about him spoke French, so his need of English was not so great as it might have been. At all events, he was able to soon gave up the attempt to learn the new language and continued to speak the Archaic French of his Norman birthplace till the day of his death.

Canadian Bond Sales

Canadian bond sales during the week ended October 24 amounted to $3,624,754, bringing the total for the year to date up to $497,357,196, classified as follows: Government, $358,928,332; municipal, $41,552,876; corporation, $101,533,000; and railroad, $41,342,957. These bonds were disposed of in the following markets: Canada, $300,123,963; United States, $200,745,000; and Great Britain, $27,978,233.

Cattle Shipments Increasing

With the record for export of live-stock from the province already broken, officials of the provincial department of agriculture, livestock branch, anticipate that the 100,000 mark will be passed this year.

During the first ten months of the year, 97,000 head have been exported, compared with 70,651 head for the same period last year and 58,793 in 1923.

WORLD HAPPENINGS BRIEFLY TOLD

Turkish telephone operators are considering a strike, following refusal of demands for wage increases.

A gas mask replacing its own oxygen has been invented by H. C. Carter, of Victoria, Australia. This has partially solved, at least, the problem of masks for divers and miners.

The world's largest saxophone recently made its appearance in London in a musical display. It is 23 feet high and the bell is four feet in diameter.

Basalt, a little town in the mountains of Colorado, is so prosperous, it has asked the state public utilities commission permission to provide water to its residents free of charge.

During the demolition of a very old house in a village near Bergamo, Italy, a human skull filled with antique gold and silver coins was found in a hollow wall.

Commercial travellers in some parts of California use homing pigeons for rushing orders to their head quarters. Homing pigeons are carried by the travellers and released when needed.

Provision for the upkeep of his large string of horses until their natural death and the erection then of stones over their graves, is made in the will of the late David Shaw, millionaire horse fancier of Cleveland.

Communism can gain no footing in Britain if good houses, food and opportunities to succeed, are available, declares Miss Irene Ward, political student, in an address before the Canadian Club at Toronto.

A resolution, re-affirming the stand of organized labor in the United States in favor of the principles of the world court, was passed by the executive of the American Federation of Labor at Washington.

Canada has decided to take part in the British Industries Fair which is to be held in London and Birmingham in February next. The Canadian chamber of commerce in London, by arrangement with the high commissioner for Canada, is organizing the Canadian exhibit at the London section.

Sapia Sutliey, a Havasupai Indian, of Grand Canyon, Arizona, has been thrown from his horse for the first time in one hundred years. The previous occasion was when he was four years old. He is now 104. This time, however, he was critically injured.

Sensational Ore Find In B.C.

Rich Strike of Ore Discovered by Lucky Prospectors

A dispatch from Terrace, B.C., states that samples of ore reaching there from the latest big discovery near Vanarsdol, a station on the Canadian National Railways a few miles east of Terrace, are of a sensational character and have created much excitement among mining men. Assays of the ore run $75 to $250 per ton. But of equal interest is the size of the veins and the great amount of mineral they carry, nearly all high grade with exceedingly rich streaks or pockets. The veins on the Silver Bow claim, which was located by the original discoverer, William Van Meter, have been traced to adjoining claims and arrangements are being made by Van Meter and the George Little syndicate, of Terrace, to drive tunnels on their respective properties. The location is only two and a half miles from the Canadian National Railways and is ideally located for development work.

Not Thrilled By City Life

Eskimos Apparently Not Impressed By Sights in Montreal

After seeing all the sights of a modern city the four young Eskimos, seamen who joined the Jean Revillon, an Arctic fur-trading schooner, when she was brought to Liverpool, N.S., for overhauling, were apparently not thrilled.

The only modern thing man likes to which they have become partial, is tobacco, for they smoke continually.

The Eskimos went from Montreal to Fagne, Ontario, where they will stay for the winter. It will be impossible to send the four back before the spring, so the natives are being kept at Fagne until an opportunity occurs in the spring to take them overland to their home at Baker Lake.

An important piece of Dominion-wide legislation is compulsory patrol of railway lines throughout the forest of areas of the Dominion for the protection of fires caused by locomotives and railway operation generally.

Farmer (using telephone for the first time)—Send me a bushel of oats. Video Over the Wires—Who are they for? Farmer—Don't be funny with me, my lad. They are for my horse.

Curb Red Activities

Communists In Western Canada To Be Closely Watched From Ottawa

Activities of Communists in Western Canada are being closely watched from Ottawa. The Communist publications in Winnipeg, referred to in a Winnipeg newspaper, are being scrutinized and action will no doubt be taken where the law is traversed by such publications. The chief interest of the Dominion Government in Communist activity hitherto has lain in the efforts made to penetrate organized labor, and these efforts have not so far met with any great success, it is pointed out here.

The education of young children in the tenets of Sovietism is undoubtedly going on, it is said. The recent deportation of a whole family from Winnipeg back to England resulted from the seditious speeches made by a young boy at a May Day demonstration. This action was taken by the immigration department, which along with the labor department and the Royal Canadian Mounted Police, are interested in the Communistic movement in Canada.

Britain's Offer Is Generous

Interests of Egypt Would Be Protected In Control of Nile

Within the period of a generation one of the longest rivers in the world, from its headwaters to the sea, should be completely harnessed to the service of man. Regulated, controlled, and disciplined, the achievement will be unsurpassed by any engineering feat, ancient or modern. How is the safety of these great works to be ensured? Egypt demands the evacuation of the Sudan by Great Britain, and the creation of a semi-independent state under her own direction. She demands that the water requirements of the Sudan, and thus its entire development, should be subordinated to her own needs. Great Britain offers Egypt a defensive alliance, a partnership in the administration of the Sudan, and the placing of the control of the Nile in the hands of a neutral and international body. In the opinion of the many thousands of forthcoming living in Egypt, who are in a position to form an unprejudiced judgment, England's offer is generous in the extreme.—T. H. Barron in the Nineteenth Century.

Vagrant Children In Russia

Big Cities Overrun By Homeless, Half-Starved Waifs

Vagrant children in Russia number more than 300,000, the commissar of education has found. He characterized it as a situation menacing the welfare of the country and accordingly has organized a new system of factory schools for homeless children.

The big centres, like Moscow, Leningrad, Kharkow and Odessa, are overrun by homeless waifs who sleep on the sidewalks, half-naked and half-starved. The "Central Lenin Fund" for vagrant children, to which the government contributed several million roubles and to which another few millions have been added by voluntary contributions, has been found insufficient.

The factory school intends to teach the waifs various trades in addition to their general education.

New Fire Fighting Plane For Manitoba

If Machine is Successful Others May Be Constructed

A seven-passenger twin engine flying boat, which it is said will revolutionize the aerial fire fighting methods used by the government provincial patrols, is being tested at the Dominion Government airdrome at Scott Marsh, near Ottawa. If satisfactory, it will be flown to Manitoba, where it will take on fire protective duties in one of the most important forest areas.

Although practically the same size as an ordinary machine and with two engines on either side of the body of the wing of only 900 horsepower, the machine is capable of a speed of between 90 and 100 miles an hour.

If this machine is successful others of the same type may be constructed for fire fighting purposes.

Ontario's Honey Crop

Ontario's crop of honey this year is of exceptionally high quality, and already 1,000 pounds of new honey have been moved through the co-operative association. The product of Ontario's apiaries is now finding its way into the Scandinavian countries, France, Belgium, Holland, Germany and Switzerland.

Alberta-Made Sugar

October 25th saw Alberta-made sugar, from the factory of Raymond, Alberta, on the market. The product of Alberta beets is said to be fully equal to that made from Cuban cane and with the extension of growing operations in Southern Alberta, it is expected to extend the market.

ECLIPSE FASHIONS

Exclusive Patterns

by Hazel Dayne

The Fashionable Flare

Fine wool twill fashions this frock with the front of the shirt flaring in the dashing new manner. Very simple and very chic are the lines of this youthful frock, which may be worn successfully for any day-time occasion. The plain back extends over the shoulder at the front in yoke effect, to which the front is slightly gathered. Small, round buttons fastening with loops of braid make an attractive closing for the convertible collar, which is worn buttoned close to the neck. The lower section of the full sleeves is banded with a handsome oriental trimming, a narrower width being used for the collar. The diagram pictures the simple design of No. 1222, which is in sizes 16, 18, and 20 years (34, 36 and 38 inches bust). Size 18 years (36 bust) requires 4¼ yards of 36-inch, or 4¼ yards of 40-inch material. Price 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Sweden Had Unusual Summer

Average Temperature Was High With An Abundant Rainfall

The official daily weather records, which in Sweden go back two hundred years, reveal for the past season a number of astonishing facts. On several occasions this summer Swedes has been warmer than Italy, and the average temperature for July was higher in Stockholm than in Paris. The rainfall was also three times more abundant than usual and yet the number of hours with sunshine came close to the record, held by 1914. The Swedish crop has been remarkably abundant this year and the weather conditions for the harvest favorable.

Alberta Good Roads

Ambitious Road Building Programme Will Be Completed in 1927

By 1927 the Alberta Government hopes to complete its $3,500,000 road building programme, so Hon. Alex. Ross, minister of public works, announced. By that time the province will have earned a $1,000,000 grant from the Federal Government. Subgrades are being constructed on 2,500 miles of highway. Six hundred miles have been surfaced already, and about 500 miles gravelled. Ultimately all the main highways in Alberta, leading east, west, north and south, will be gravelled.

Many Autos Registered

More than 52,000 motor cars are operating in Alberta this year, compared with something over 47,000 in 1924. The total receipts from car licences up to the middle of November this year were $912,000, compared with $845,000 for the entire year of 1924.

He.—But don't you cook much more for dinner than we use, darling? She.—Of course, silly! If I didn't, how could I economize by making left-over dishes?

Powerful Rays From Cosmic Spaces

Graduate Of Saskatchewan University Is Associated With Great Scientific Discovery

Rays more penetrating, and more powerful than anything heretofore known or imagined on earth have been discovered, studied and measured by Dr. Robert A. Millikan, of the California institute of Technology, Pasadena, America's most famous scientist, with whom have been associated in the last most fruitful years of his research work G. Harvey Cameron, son of Principal A. W. Cameron, of Nutana Collegiate Institute, Saskatoon, and a gold medallist of the University of Saskatchewan.

Announcement of the remarkable discoveries made by the two scientists was made by Dr. Millikan recently at a meeting of the National Academy of Sciences at Madison, Wis. He told of invisible messengers from the great cosmic spaces beyond the ken of man, rays approximately 100 times more penetrating than the most powerful X-rays produced in hospitals and laboratories.

Mr. Cameron, whose share in the discovery brings him into world prominence as a scientist, was graduated with honors from the University of Saskatchewan with a Bachelor of Science degree in 1921. On the recommendation of Dean G. H. Ling and Dr. R. L. Harrington, Mr. Cameron was given a teaching fellowship in the California institute immediately after graduation.

Interesting Secret Revealed

How British Admiralty Obtained Possession of German Signal Codes

An interesting piece of secret history, which explains how the German naval signal codes came into the hands of the British admiralty, has just been revealed in London.

When the German cruiser Magdeburg struck a mine near the island of Odensholm, off the Esthonian coast, the crew abandoned the ship and surrendered. But it was pointed by some Russians that one of the German officers jumped overboard.

This aroused the Russians' curiosity, the spot was noted, and a diver was sent down. He recovered the body of the officer, and it was then found that he had secured in his pocket a number of secret German naval codes.

A copy of these codes was supplied to the British admiralty, but the Germans, unaware that they had fallen into hostile hands, continued to use them. It is stated that the possession of these German codes was of considerable value to the British fleet during the battle of Jutland.

Prince Has To Make Report

Always Talks With Premier Before and After Empire Tour

It has always been the practice of the Prince of Wales before starting on an empire tour to have a talk with the premier of the day and to report to him, as it were, on his return. This was the occasion for an interview the Prince had with Mr. Baldwin at York House, when no doubt he had much of interest to impart. The ambassador of empire has yet another "report" to make. It is to the lord mayor and citizens of London, and the occasion for it will be a state luncheon. It was at a similar function that the present King, when Prince of Wales, made his famous "Wake up, England" speech. His son may have no such stirring slogan, but an address of unusual interest is expected.—Liverpool Weekly Post.

Created Canadian Record

Pen of White Leghorns at Langley, B.C., Wins Egg-Laying Contest

With a grand total of 2,602 eggs, the pen of White Leghorns owned by F. H. Mufford, Langley, has won the fifth egg-laying contest at the Dominion experimental farm, Agassiz, B.C. The pen has not only created a Canadian record but probably a world record under official test, according to W. H. Hicks, superintendent of the station. The hens of the winning pen of ten birds have an average of 260 eggs each.

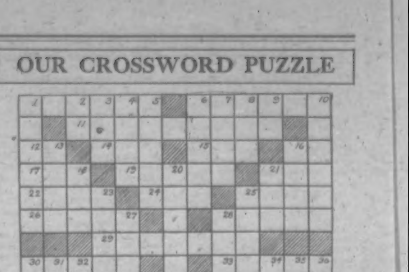
Equine Casualties in the War

The horse and mule casualties on the western front during the World War, distinct from accidental injuries, is placed at 130,856 killed and injured in the official history of the veterinary services. Of this number, 178 were killed and 1,868 injured by gas and 61,806 were killed and 67,832 wounded by shotgun.

Profitable Whaling Industry

British Columbia's whaling industry annually produces about 600 tons of whale bone meal and 900 tons of meat and blood for fertilizing purposes. A small quantity of this is sold as fertilizer in the province and the remainder is exported, principally to the United States.

OUR CROSSWORD PUZZLE



Horizontal

1—One who captures.
6—People who are in different to pleasure or pain.
11—Purchasers of secure rites.
12—Near.
14—Spread to dry.
15—Steel.
16—Engineering degree.
17—Vehicle used for moving.
19—Pertaining to ships.
21—Wing-like organ.
23—Cod of love.
24—Pinch.
25—An astringent.
26—Watery portion of certain animal fluids.
28—Small bodies of land.
29—Dutch merchant vessels.
30—Reward.
32—Perceive.
37—Mohammedan prince
38—Kitchen utensil.
40—Kind of duck.
41—Illuminated.
42—Was concerned.
44—Bend.
45—Pronoun.
46—Belonging to us.
47—Negative
49—Sir.
50—Kind of deer (pl.).
52—Kind of match (pl.).
53—Fame.

Vertical

1—Desires earnestly.
2—Jumbled type.
3—High explosive.
4—Soothing agents.
5—Projection in a wall.
6—Long, narrow piece of leather.
7—Implement.
8—Circle.
9—Estate.
10—Emits vapor.
12—Weed.
13—Hint.
18—Negative conjunction
20—Caller.
21—Everything.
22—Sweet food.
25—An article in the property of a deceased person.
27—Month of the year.
28—Possessive pronoun.
30—Redress.
31—Poor forth.
32—Deep hole.
34—Gain as clear profit.
35—Single.
39—Type of male voice.
42—Cunning.
43—Stupefying drug.
46—Single unit.
48—Twice five.
50—Sine.
51—Therefore.

Thrilling Rescue Of A Steeplejack

Was Overcome By Fumes At Top Of Factory Chimney

Large crowds at Witton, England, watched breathlessly the thrilling rescue of a steeplejack who was overcome by fumes at the top of a 100-foot factory chimney.

The steeplejack, Harold Edginton, was engaged in pointing the brickwork when he reeled and fell unconscious, with one leg inside and the other outside the chimney.

His employer's son, Bert Cross, climbed up the chimney, pulling up boards and ropes after him. He succeeded in lashing Edginton to the boards, and in placing his head in such a position that it was out of reach of the fumes.

Darkness had set in by this time, and the Birmingham firemen, who had been sent for, directed a search-light on the figure lying on the boards in mid-air.

Firemen then ascended the stack, and Edginton was safely brought down and taken to the hospital in a serious condition.

New Pulp Mill

Construction Work Started For Manitoba Pulp and Paper Company

Work is now under way on the 250-ton pulp and paper mill being erected by the Manitoba Pulp and Paper Company, Limited, according to Col. H. C. L. Jones, vice-president of the Spanish River Pulp and Paper Company, which is behind the venture. The mill, when completed, will be very similar to the one now owned by the latter company at Espanola, Ontario, and the construction conditions on the two sites are also alike.

A Problem

Silas.—"Old man Hickey looks worried."

Hiram.—"Yes, he's tryin' to think of a way to move his city property out here in the country. He says it would make a nice bet now."

Silas.—"What did he buy in the city?"

Hiram.—"The Brooklyn bridge."

Mrs. Gableigh (at the shore).—I often wonder what the wild waves are saying.

Husband.—Nothing, Maria. They are like some people I know; they make a great deal of noise but they don't say anything.

Faced Ordeal At Sea

Father and Daughter Shipwrecked in Nine-Ton Yacht

William S. Unitt and his 16-year-old daughter reached Bristol with a thrilling story of their attempt to sail to New Zealand in a 9-ton yacht, the Merganser.

Everything went well until September 8, said Mr. Unitt, when, off Flat Holm, they struck a succession of heavy gales.

"Boxed in and battened down tight for three days at a time, we were utterly helpless and at the mercy of the storm."

In collision with a French trawler the Merganser's bowsprit was swept away, and later the two occupants of the tiny craft saw a steamer founder less than 100 yards away.

The sextant, chart, chronometer and almost everything movable was washed away. The end of their adventure came when the Merganser ran on to a sandbank outside Carmarthen Harbor.

Both father and daughter declare that they are willing to repeat the attempt.

Unemployed Insurance

Commission of Twelve is Appointed by British Government

Twelve men of the highest standing have been chosen by the department of labor in Britain to make an exhaustive inquiry into the system of unemployment insurance, commonly known as dole, and to report its effect upon the morale of working people.

Under the terms of reference the committee will be able to make a most thorough survey of a subject that has proved a nightmare to successive governments, including the Socialist regime of Ramsay MacDonald.

The acts which authorize the giving of state aid to unemployed workmen will expire next June, but it is hoped by the committee's report will be ready long before. The inquiry will extend to every industrial community, with special attention to methods of administration, which in many districts are so poor that capable workmen need never seek employment, but can live in comparative ease upon donations from the taxpayers' funds.

Knew What He Wanted

The Rev. Angus M'Glasson, a Scot of many years but a few words, was on a flying visit to the Jamlesons, who had years ago been members of his congregation.

"Will you take a cup o' tea, Mr. M'Glasson?" said the kindly Mrs. Jamleson.

"No thanks, no tea," replied he.

"A cup of coffee, then?"

"No coffee."

"Will I mak' ye cocoa?"

"No cocoa."

"Why, then, Mr. M'Glasson, will ye hae a glass o' whusky and soda?"

"No soda."

It is estimated that $60,000,000 persons in the world wear shoes of some kind.

Alberta Oil Wells

About 80,000 Square Miles in Province That Have Petroleum Possibilities

There are approximately 80,000 square miles in Alberta that have petroleum possibilities, according to a reported statement made by Dr. Allan, of the University of Alberta. Development work included 96 wells drilled to 1925, about 15 wells completed and at August, 1925, 15 wells were being drilled. Oil production from Alberta, 1915, to 1924, was 60,000 barrels.

SPOHN'S DISTEMPER COMPOUND
Keep your horses working with "SPOHN'S." Standard remedy for 30 years for Distemper, Strangles, Influenza, Coughs and Colds. Give to sick and those exposed. Give "SPOHN'S" for long life and safety. Sold by your druggist. If not, order from us. Two sizes, large and small. Write for free booklet on Diseases of Horses. SPOHN MEDICAL CO. Dept 21 GOSHEN, IND.

BAREE, SON OF KAZAN

by James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.

"BAREE, SON OF KAZAN," a Vitagraph Picture, With Wolf, the War Dog, Is an Adaptation of This Story

SYNOPSIS

Baree, the wolf-dog, attracted from the cabin of Pierrot, the trapper, by the call of the wolves, and Mahegunn, the young she-wolf who was on the same quest, at length overtook the pack. A gray wolf advanced to Mahegunn and she snarled at him. Baree fought to protect her, whereupon a horde of the beasts attacked him and he barely escaped with his life. Badly wounded, and dazed, because he had been cast out by his own kind—he was half-wolf—he fled and again wandered alone through the woods.

CHAPTER XVIII.—Continued.

He did not hear, a few minutes later the howling of the disappointed wolf-horde on the other side of the river, and he no longer sensed the existence of moon or stars. Half dead, he dragged himself on until by chance he came to a clump of dwarf spruce. Into this he struggled, and then dropped exhausted.

All that night and until noon the next day Baree lay without moving. The fever burned in his blood; it flamed high and swift toward death; then it ebbed slowly, and life conquered. At noon he came forth. He was weak, and he wobbled on his legs. His blind legs still dragged, and he was racked with pain.

A red ferocity grew in Baree's eyes as he snarled in the direction of last night's fight with the wolves. They were no longer his people. They were no longer of his blood. Never again could the hunt-call lure him or the voice of the pack rouse the old longing. In him there was a thing new-born, an undying hatred for the wolf, a hatred that was to grow in him until it became like a disease in his vitals, a thing ever present and insistent, demanding vengeance on their kind.

CHAPTER XIX.

At the cabin on the Gray Loon, on the fourth night of Baree's absence, Pierrot was smoking his pipe after a great supper of caribou tenderloin he had brought in from the trail, and Nepecse was listening to his tale of the remarkable duel he had made, when a sound at the door interrupted them. Nepecse opened it, and Baree came in. The cry of welcome that was on the girl's lips died there instantly, and Pierrot stared as if he could not quite believe this creature that had returned was the wolf-dog. Three days and nights of hunger in which he could not bear to take one of the fat that clogged had put on him the marks of starvation. Battle-scarred and covered with dried blood-clots that still clung tenaciously to his long hair, he was a sight that drew at last a long breath from Nepecse. A queer smile was growing in Pierrot's face as he leaned forward in his chair; and then slowly rising to his feet, and looking closer, he said to Nepecse:

"Ventre Saint Gris! Oui, he has been to the pack, Nepecse, and the pack turned on him. It was not a two-wolf fight—non! It was the pack. He is cut and torn in fifty places. And—mon Dieu, he is alive!"

In Pierrot's voice there was growing wonder and amazement. He was incredulous, and yet he could not disbelieve what his eyes told him. What had happened was nothing short of a miracle, and for a time he uttered not a word more but remained staring in silence while Nepecse woke from her astonishment to give Baree doctoring and food. After he had eaten ravenously of cold boiled moat she began bathing his wounds in warm water, and after that she soothed them with bear-grease, talking to him all the time in her soft Cree.

In a week or two the heavier snows came, and Pierrot began making his trips over the trap-lines. Nepecse had entered into a thrilling bargain with him this winter. Pierrot had taken her into partnership. Every fifth trap, every fifth deadfall, and every fifth poison-bait was to be her own, and what they caught or killed was to bring a bit nearer to realization a wonderful dream that was growing in the Willow's soul. Pierrot had promised. If they had great luck that winter, they would go down together on the last snows to Nelson House and buy the little old organ that was for sale there; and if the organ was sold, they would work another winter, and get a new one.

"To Nepecse and Baree it was a wild and joyous adventure that never for a day grew tiresome."

This plan gave Nepecse an enthusiastic and tireless interest in the trap-line. With Pierrot it was more or less a fine bit of strategy. Her would have to kill before he gave Nepecse the organ; he was determined that she should have it, whether the fifth traps and the fifth deadfalls and the fifth poison-baits caught the fur or not. The partnership meant nothing so far as that was concerned. But in another way it meant to Nepecse a business interest, the thrill of personal achievement. Pierrot impressed on her that it made a comrade and co-worker of her on the trail. That was his scheme; to keep her with him when he was away from the cabin. He knew that Bush McTaggart would come again to the Gray Loon, probably more than once during the winter. He had swift dogs, and it was a short journey. And when McTaggart came, Nepecse must not be at the cabin—alone.

Pierrot's trap-line swung into the north and west covering in all a matter of fifty miles, with an average of two traps, one deadfall and a poison-bait to each mile. It was a twisting line blazed along streams for mink, otter and marten, piercing the deepest forests for fisher-cat and lynx and crossing lakes and storm-swept ridges of barren where the snow-shoe hare was set for fox and wolf. Halfway over this line Pierrot had built a small log cabin, and at the end of it another, so that a day' swork meant twenty-five miles. This was easy for Pierrot, and not hard on Nepecse after the first few days.

All through October and November they made the trips regularly, making the round every six days, which gave one day of rest at the cabin on the Gray Loon and another day in the cabin at the end of the trail. To Pierrot the winter's work was business, the labor of his people for many generations back; to Nepecse and Baree it was a wild and joyous adventure that never for a day grew tiresome. Even Pierrot could not quite immunize himself against their enthusiasm. It was infectious, and he was happier than he had been since his son had met that evening the princess mother died.

One afternoon early in December, as they were returning to the Gray Loon, Pierrot stopped suddenly a dozen paces ahead of Nepecse and stared at the snow. A strange snowshoe trail had joined their own and was heading toward the cabin. For half a minute Pierrot was silent and scarcely moved a muscle as he stared. The trail came straight out of the north—and off there was Lac Bain. Also they were the marks of large snowshoes, and the stride indicated was that of a tall man. Before Pierrot had spoken, Nepecse had guessed what they meant.

"M'sieu the Factor from Lac Bain!" she said.

Pierrot, deep in his own sombre thoughts, scarcely heard the strange laugh that came suddenly from her lips. Nepecse was listening to the growl that was again in Baree's throat. It was a low but terrible sound. When half a mile from the cabin, she unslung the panniers from his shoulders and carried them herself. Ten minutes later they saw a man advancing to meet them.

It was not McTaggart.—Pierrot recognized him, and with an unsteady breath of relief waved his hand. It was Dollar, who trapped in the Barren Country north of Lac Bain. Pierrot knew him well. They had exchanged furs often. They were friends and there was pleasure in the grip of their hands. Dollar stared then at Nepecse.

Dollar lost no time in explaining his mission; and before they reached the cabin Pierrot and Nepecse knew why he had come. M'sieu, the Factor at Lac Bain, was leaving on a journey in five days, and he had sent Dollar as a special messenger to request Pierrot to come up to assist the clerk and the half-breed storekeeper in his absence. Pierrot made no comment at first. But he was thinking. Why had Bush McTaggart sent for him? Why had he not chosen some one nearer? Not until a fire was crackling in the sheet-iron stove in the cabin, and Nepecse was busily engaged getting supper, did he voice these questions to the fur-hunter.

Dollar shrugged his shoulders.

"He asked me, at first, if I could stay. But I have a wife with a bad lung, Pierrot. It was cagged in frost last winter, and I dare not leave her long alone. He has great faith in you. Besides, you know all the trappers on the Company's books at Lac Bain. So he sent for you, and hopes you not to worry about your fur-lines, as he will pay you double what you would catch in this time you are at the Post."

(To be continued)

It Will Relieve a Cold—

Colds are the commonest ailments of mankind and of mankind only, and lead to many serious illness. Dr. Thomas' Eclectric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it cures the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

More Than A Name

Prince of Wales is Real Living Person to Millions

The Prince of Wales is today something much more than a mere historic name. To millions of men, women and children of nearly all races, colors and creeds the present bearer of the title has become a real living person. Almost wherever the flag flies he has been enthusiastically acclaimed and cheered, "because," as was said of him by a prominent Boer on Table Mountain, "we know a man when we see him." From now onwards he and all that he represents count as something tangible and personal in their lives. In the words of another South African, he has completely changed the ideas of himself and his fellows on Royalty: "We realize," he declared, "that they are people very like ourselves."—London Times.

The Perfect Guide

Undertook to Show the Visitors the Big Chief

C. S. Caverly, the English humorist, was a practical joker. One day when acting as a guide at Oxford for a party of American friends he stood under the window of the late Benjamin Jowett, master of Balliol College, and said: "This, friends, is Balliol College, reckoned to be the second oldest college in Oxford. The head of the college is called 'the master.' The present master is the celebrated Prof. Jowett." Then stooping down and picking up some gravel and throwing it up, disturbing the great man at his studies, brought him red with fury to the window—"and that, ladies and gentlemen, is Prof. Jowett."—Everybody's Magazine.

CHILDREN LIKE BABY'S OWN TABLETS

Because They Are Tasteless and Are Easy to Take

One of the strongest points in favor of any medicine for children is that it is so agreeable that the mother does not have to force it down the little one's throat.

Baby's Own Tablets have no drug taste, may be crushed to a powder if desired, and babies like them. They are perfectly safe for they contain no opiate or narcotic. They sweeten the stomach and remove the cause of constipation.

Mrs. Arthur Charlebois, Pawtucket, R.I., says: "I have found Baby's Own Tablets to be a gentle laxative and a safe remedy for stomach disorders in children. Our little boy had been given harsh cathartics, but these tablets worked more effectively without the severe griping. I can recommend them to all mothers of little children."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Antelope In National Park

Antelope, which were threatened with extinction in Canada a few years ago, have been successfully preserved in Nemiskam National Park. When this preserve was established in 1915, there were only 45 in the herd, the last survivors of thousands that once had roamed the prairies. There are now 255 in the herd.

White pine is the most valuable softwood in Canada, and is exceeded in average value only by walnut, chestnut and oak.

Zoo Specimens For France

Buffalo, Mountain Sheep and Mountain Goats Presented by Canadian Government

The steamer Welland County, sailing from Montreal will carry two buffalo, three Rocky Mountain sheep and three Rocky Mountain goats, gifts from the Canadian Government to the National Museum of Natural History in Paris, France.

The buffalo were taken from the national herd in Buffalo National Park, Wainwright, Alta., while the consignment of sheep and goats are from Rocky Mountain National Park, Banff, Alta. The shipment was consolidated at Winnipeg.

Minard's Liniment for stiff muscles

Microphones Are Effective

New Innovation in British House of Lords May Cause Trouble

Installation of microphones and earphones in the British House of Lords, so that the hitherto inaudible debates may be heard, threatens to disrupt many friendships.

It has been discovered that the slightest whisper enters the microphones and can be heard by any person who happens to have his phones over his ears.

The result of this sensitiveness of the microphone today was an endless series of interjections during the speeches. Such comments as "Why doesn't he shut up?" "What rot," etc., were plainly audible.

Certain morbid conditions exist in the stomach and intestines to encourage worms, and they will exist as long as these morbid conditions prevail them to be rid of them and spare the child suffering, use Miller's Worm Powders. They will correct the digestive irregularities by destroying the worms, conditions favorable to worms will disappear, and the child will have no more suffering from that cause.

Wins Typewriting Championship

Miss Eleanor Mitchell, an English girl, won the European speed typewriting championship with 812 "touches"—129 words a minute. Forty of the speediest typists of France, Belgium, Switzerland, Spain, Italy and Britain participated.

Ah, well; while rocking the boat he isn't disputing the right of way with a locomotive.

Odd Hours For Work

Inventor Finds His Brain Is Clearest Early In the Morning

Different people have different ways of working. Mr. Louis Brennan, C.B., the inventor of the Brennan torpedo and the gyroscopic monorail system of transport, wakes up regularly at about 2 a.m. He buries himself with thinking out problems, elaborating his theories, etc., for a couple of hours, at the end of which time he as regularly sleeps again, getting up a few hours later. From long experience, Mr. Brennan, who is now engaged in developing the principle of the helicopter, finds his brain clearer, and conditions generally more favorable for effective work, in the early morning than at any other time of the day.

* * *

Miss Broadfoot, of the public school staff, has been compelled to take a few weeks leave of absence owing to illness. She is at present under the doctor's care.

* * *

Mrs. A. R. Ballantyne has sufficiently recovered from her recent illness to be out around again. Unfortunately her daughter is now confined to her bed, suffering from an attack of pneumonia.

* * *

As a result of the recent trouble between the school board and teachers at Blairmore, the school in that town is now in very bad shape according to the last report of the school inspector.

* * *

At the school board meeting last Monday Keetley Johnson was re-engaged as Secretary of the board for this year. The contract for dray work around the school was let to Wm. Nunesby.

* * *

Robt. Gardiner, former M.P. for this constituency, and now representing Acadia, has been appointed representative for Alberta on the Progressive executive at Ottawa. Robt. Forke was again chosen leader, H. E. Spencer, of Battle River, whip.

* * *

An announcement regarding the return of the natural resources to the province of Alberta will be made within the next few days, according to a statement made by premier King after an interview with Alberta's premier.

* * *

The opening of school after the Christmas holidays resulted in serious over-crowding in almost every room. Three teachers now have over fifty pupils each, and great trouble is experienced to find seats for the pupils During the vacation season several new families have moved to town.

* * *

In celebration of his umpty-ump birthday, Bill Keats gave a dance in Cliff hall last Monday evening. The young people were out in full force and thoroughly enjoyed the event.

At the conclusion all said they hoped Bill would never get too old to celebrate his birthday in this way.

* * *

Rev. R. N. Matheson gave his illustrated lecture in the Fifth Avenue United church, Medicine Hat, last Tuesday evening. The slides and the address gave a very good idea of the fruitful missionary work being carried on by the United Church of Canada.

* * *

Mrs. Fred Jones entertained a few of her children's friends to a Whist drive and social evening on New Year's eve. Ted Johnson and Margaret Moore won first prize, and the consolations went to Arthur Johnson and Muriel Belisle. A dainty supper was served and the house was nicely decorated for the occasion.

* * *

Judging from the number of cars which have been loaded and shipped from the Dominion Glass plant here during the past week, business in that line must be improving. It is hoped it will continue and that the plant will soon find it necessary to open up full tilt again. It looks as though prospects were very promising for this to happen.

Mr. and Mrs. Stanley Britt and child leave next Monday for London, England, where they will reside in future.

* * *

Clyde Warner of the Broadway Dept. Store, returned to town yesterday after spending the Christmas season with his family in Wyoming.

* * *

Don't fail to hear Mr. A. A. McGillivray and the Conservative candidate at the public meeting in the Cameo theatre tonight.

* * *

High school pupils, and especially the debaters, should not miss hearing Mr. McGillivray at the Cameo theatre tonight. They might get some pointers in public speaking.

* * *

A petition asking the government to complete the highway from Medicine Hat to Havre, is being circulated in town. It may be seen at Hall's drug store.

* * *

Mrs. Allen Ellis entertained a number of young friends New Year's eve at her home. Games and dancing indulged in there present, and all had a thoroughly enjoyable time.

* * *

Let Redcliff show that it appreciates getting the Big men of the province to our town by turning out in full force to the public meeting in the Cameo theatre tonight, when A.A. McGillivray will address the meeting.

* * *

Dominion progressive members elect had a caucus in Ottawa this week when they decided to present a united front during the present session of parliament. This is said to include the "ginger group."

SHOPPING AT THE MADEIRA ISLANDS

Statue of Zargo, Funchal

Empress of Scotland in Madeira Bay

To buy, or not to buy,—that is the question. 'Tis a simple question to answer at the Madeira Islands, where cruise boats usually make their first stop, because everyone knows the fineness of the embroidery which have grown so much to advertise the pretty little islands where Columbus chose his wife! The difficulty is, which pieces of the thousands displayed should be selected. Madeira luncheon sets, pillow cases, tea cloths and doilies are both attractive and practical, and if you have tiny friends or public misses at home, you will not be able to resist the adorable little baby dresses of the sheerest linen and daintiest embroidery.

At Funchal, first stop of the Canadian Pacific liner "Empress of Scotland" on the Mediterranean cruise, there are dozens of shops where this embroidery is sold. The natives also make intricately woven baskets and reed furniture, but as furniture is not easy to carry round on a cruise, and even baskets are somewhat cumbersome, although there is scarcely any limit to the amount of luggage long suffering steamship companies allow their passengers, it is in the narrow streets of Funchal, paved with small, round topped stones laid in geometric designs, that the tourist usually makes his purchases. Sometimes, if luck is with you, you may be able to buy an exquisite piece of handwork from a pretty young embroidering in her fragrant garden. But if you are a bachelor, remember the fate of Columbus and beware the fair maids of Madeira.

It is not even necessary to set foot on the soil of Madeira to buy the tempting native products, for hundreds of small boats, with natives vociferously displaying their wares, come dancing over the waves to meet the cruise steamers. But the prices are not as reasonable and the handwork not as fine as in the shops along the narrow, quaintly paced streets. Then, too, it would be a pity to miss a ride in the popular toboggan sleds which are the chief means of transportation down Funchal's big mountain, Terrare de Leeba.
